Professional Summary

Driven System Administrator with over 5 years of experience in software implementation and maintenance. Proven history of managing complex infrastructures and data center operations. Expert in solutions-oriented business application problem-solving and dedicated to providing best-in-class service. Skilled at troubleshooting, communication and automation.

Work History

System Administrator

2017-07 - Current

Syndeo Networks, St. Charles, IL

- Optimized system security and performance with proactive changes such as replacing all network switches, firewalls, and adding mail filtering and sandboxing
- Implemented, developed and tested installation and update of file servers, print servers and application servers
- Created systems to increase efficiency such as automation using PowerShell, creating a web platform for scraping web prices, and creating an automated licensing system

Field Technician

2015-11 - 2017-03

Armor Technologies, DeKalb, IL

- Performed software and hardware repair on desktops, laptops, phones, tablets, and game consoles
- Installed and maintained Windows domain controllers into new and existing environments using services like Active Directory, DHCP, and DNS
- Installed SIP trunking services including VoIP PBX systems and phones
- Created site-to-site VPN for network communications between office locations and client-to-site VPN for user remote access
